

## Key financial docs in one place. Automatically.

Hubdoc is a cloud-based document manager and a financial document “fetcher.” Hubdoc has proprietary technology that aggregates all your documents from banks (access to bills, receipts, statements and others via a user/password login).

### Benefits to the business

#### No Data Entry, No Filing.

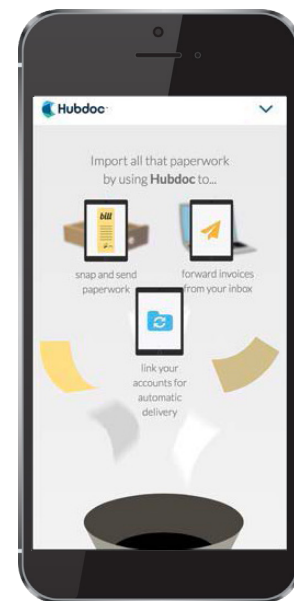

The app automatically converts receipts, bills and statements into data and stores into one secure hub. No more data entry errors!

#### Simplify, Go Paperless.

Important financial records are organized automatically for you, backed up forever and available on any device.

#### Syncs with Your Accounting.

Your receipts, bills and statements turned into accurately coded QuickBooks Online transactions with key data entered and source documents attached (and you can invite your accountant!)

### Benefits to the accountant

Alleviates the drama involved with getting primary documents from your clients.

No more needing clients to download and send you documents (or better, no more scanning of bank statements!)

Provides paid-check /deposit images from most major banks no more having to log in to a client’s banks to see those details (or chase the client for those details.)
