

SOS Inventory

Inventory, Order Management, and Manufacturing for QuickBooks Online

SOS Inventory was built from the ground up to have a tight integration with QuickBooks Online. Get sales orders, assemblies, serial inventory, multiple locations and much more, all at a fraction of the cost of traditional manufacturing systems.

Benefits to the business

Integrate with QuickBooks Online to eliminate duplicate data entry. We know what is possible with QuickBooks Online and what is not, and we've built our software to save you time and money by reducing duplicate data entry. The time (and money) your staff saves by using our software goes directly to your bottom line.

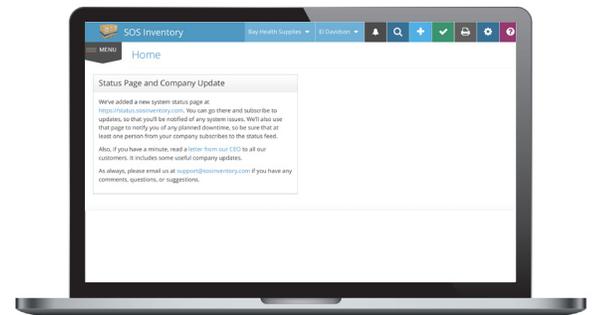

Streamline your order management. You can create sales orders and then create full or partial shipments as needed. In addition, you can automate almost all of your order workflow. Most importantly, the data will synchronize with QuickBooks Online.

Support multiple locations. See instantly how much inventory is in each of your facilities. Purchase and receive materials at each location. Ship orders from one or more locations. Transfer items between locations.

Inventory tracking by serial number/lot/batch/bin and more. SOS Inventory allows you to track inventory in just about every way. Whether you need serial / lot tracking for regulatory purposes, or whether you just need to track multiple units of measure, SOS Inventory can help.

Build simple assemblies or handle complex manufacturing scenarios. You can build assemblies from component items and your finished inventory will be updated along with raw inventory. SOS Inventory can also handle complex scenarios such as process manufacturing, disassembly, waste, work-in-progress, job costing, and much more.

Pick, pack, and ship. Create pick tickets / packing slips directly from sales orders, from QuickBooks Online invoices and sales receipts, or from scratch. SOS inventory also supports partial shipments.

SOS Inventory

Benefits to the accountant

Tight Integration with QuickBooks Online.

SOS Inventory has been integrating with QuickBooks Online since 2009. We are a market leader in QuickBooks Online integration, including a number of unique and innovative integration points. Most importantly, we integrate at the item/transaction level, so that everything works seamlessly.

Tools for Reconciliation.

SOS Inventory has industry-leading reconciliation tools to help you manage monthly, quarterly, and annual inventory reconciliation. We provide tools not only to help with physical inventory counts, but also tools to help reconcile inventory data with accounting data in QuickBooks Online.

Granular Controls.

You have extensive and detailed control over your inventory and financial data when using SOS Inventory. You control exactly which data synchronize to QuickBooks (and when). Further, SOS supports over 50 different user permissions, so that you can keep inventory users out of QuickBooks, or vice-versa.
