AutoEntry

AutoEntry is a solution for accountants and bookkeepers as well as businesses of all sizes. With its flexible pricing, AutoEntry is the most cost-effective solution of its kind and the most intelligent, offering a wide range of time-saving features to help users do more for less. Simply scan, snap or email a copy of the document you want to capture, and AutoEntry accurately automates the publishing of this information into QuickBooks online and desktop software.

## Benefits to the business

No more manual data entry. Simply scan, take a photo with our mobile app, or send your documents via email and AutoEntry will do the rest.

Grow your business. Spend more time running your business and less time on paperwork.

Go paperless. Once AutoEntry has captured and entered your data, it creates a digital record of the image in QuickBooks. You'll no longer need to store paper copies, so your office can declutter and go green.

Benefits to the accountant

Capture almost any type of document. AutoEntry captures and analyzes data from scanned and photographed images of bank and credit card statements, supplier statements, bills, invoices, receipts and more.

Capture expenses. Upload expense receipts and add them to expense reports before posting the information into your QuickBooks account.

Capture full line item detail. AutoEntry captures full line items, including the description, unit price and quantity for each line.

Match purchase orders. AutoEntry allows captured invoices to be matched to open purchase orders.

Remember how you code accounts. AutoEntry 'remembers' how you process invoices and receipts and can auto-publish these details directly into QuickBooks.

Store information in the cloud. Once AutoEntry has posted your information, it stores your data in the cloud, retrievable at the click of a button.
