

# Payments

Powered by Bolt

## Welcome to Online Invoice Payments!

Get your invoices paid faster with [Online Invoice Payments](#) powered by Payments by Bolt. Here is a checklist to help you take the next steps.

### 1 Connect to Bolt

- See our guide here <https://paywithbolt.com/kb/record-payments/> We recommend setting up Undeposited Funds bank accounts for each currency that you want to automatically record payments in.

### 3 Connect Your Payment Link

- Do you have your unique payment link? You'll need this if you want to get paid. And you'll want to insert it into your email and invoice templates to make invoicing more efficient. You'll be guided to get your link in our two-minute setup process, but in case you miss it here's how to find it <https://paywithbolt.com/kb/where-link/>

### 2 Connect Your Payment Provider

- Choose from an expanding list of payment providers around the world. You can only connect one payment provider per payment method. <https://paywithbolt.com/apps/quickbooks-online/#faq>

### 4 Activate Additional Features

- Have you turned on any other features like email notifications and part payments? Email notifications will ping you a message when an invoice gets paid and part payments allow customers to partially pay an invoice, which can be helpful if you are dealing with deposits or interval payments.
